Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 6, 8-11, 13-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites (at least 1 insoluble ion, but does <sup>not</sup> require Ca, P, Mg, or OH as that ion. Further, the language does not clearly indicate that the level of Mg is that of the appetite, as opposed to free Mg + appetite in the mix.

Claim 29 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The Mg appetite is shown to be increased, after formation as of claim 6; thus, should be claimed as such. The scope of the claim as it stands is beyond that of the specification.

Applicant's arguments filed on 5/10/04 have been fully considered but they are not persuasive. Applicant's arguments are that Yasukawa did not comminute while dissolving, and added heat and that an amorphous product results. However, the amorphous form is not claimed, and we see possible ambiguity in the language as now amended to overcome the prior art. We see increased Mg in appetite is well documented, as evidenced by the art submitted by applicant and the issue is an increase in Mg content of hydroxyl appetite over that suggested in the prior art.
